Memo to File:

RE: Inspection of Spring Creek
Mines
PRO/001/003
Cliff Phillips
INA/001/001
Beaver County, Utah

While returning from an inspection at Kinetic Mineral's Ofer Mine, DOE/021/006 on June 8, 1984 Division staff members Tom Tetting, John Whitehead, Steve Cox and Ev Hooper inspected the Carol #4 and Higgins Mines as referenced above. Based upon previous photos taken in 1976 it appeared that additional work has been completed. The waste rock dumps are larger and the lower adit/tunnel may be larger. No evidence of recent (previous couple of years) activity was found. Photos were taken of the current level of disturbance. The development work has not surpassed the two acre limitation. The location of the mines is on a State section.

Thomas N. Tetting
